

Product Specification

Akticol FA

Akticol FA is a highly active, pulverized activated carbon produced on the basis of charcoal by phosphoric acid activation.

Analysis:

Appearance	black, fine powder
Raw material	wood
Moisture	≤ 15 %
PH-value (5 % suspension)	2.0 – 5.0

Values for information purposes:

Ash:	< 10 %
Chloride	≤ 3 g/kg
Sulphide (expressed in sulphur)	≤ 20 mg/kg
Iron	≤ 200 mg/kg
Calcium	≤ 10 g/kg
Lead	≤ 2 ppm
Mercury	≤ 1 ppm
Arsenic	≤ 3 ppm
Cadmium	≤ 1 ppm
Zinc	≤ 25 ppm
Cyanides	not detectable

The purity of the activated carbon complies with the requirements for foodstuffs as defined in FCC in its current version and OIV Resolution COEI-1-CHARBO.
