

Product description

HarmoVin® is a powdered, casein-free, specific treatment agent. HarmoVin® contains a balanced, effective, non-aggressive proportion of PVPP. HarmoVin® is used to harmonise wine and is gentle on colour and aroma. HarmoVin® is based on gelatine, PVPP and silicates.

Permitted according to EU Commission Regulation no. 934/2019. User must check compliance with national regulations. Laboratory tested for purity and quality.

Dosage

Intended purpose	Dosage
Harmonisation	10 - 20 g/100 L
Slight correction	20 - 30 g/100 L
Tannin treatment	30 - 50 g/100 L
Correction of off-flavours	50 - 80 g/100 L

HarmoVin® can basically be used at any stage, including before conventional clarification processes. We recommend to carry out the treatment after clarification, however, as it is only then that flavour imperfections will be clearly discernable. Preliminary tests are recommended.

After the optimum dosage has been determined, HarmoVin® is stirred into ten times the volume of water (hand-warm if possible), mixing thoroughly so there are no lumps. HarmoVin® is then added to the main tank, stirring constantly.

Storage

Store in a dry place. Protect from odours and moisture. Always close opened packs tightly.
