

Tannivin® SR

Oenological tannin for red wine treatment

Product description

Tannivin® SR is produced from particularly pure quebracho tannin and is rich in proanthocyanidines (condensed tannins).

| | |
|----------|---|
| Benefits | <ul style="list-style-type: none">• Colour stabilisation in red wines during formation of tannin anthocyanin complexes• In must, Tannivin® SR limits oxidation of the free anthocyanins and promotes retention of grape tannins during fining.• Tannivin® SR prevents the occurrence of a reductive flavour (maturation sur lies).• Optimises flocculation effect during fining. |
| Tip | <ul style="list-style-type: none">• Tannivin® SR is particularly suitable for red wine making. Addition at an early stage increases the colour stabilisation effect. |

Permitted according to EU Commission Regulation no. 934/2019. User must check compliance with national regulations. Laboratory tested for purity and quality.

Dosage

| | |
|-------------|---|
| Dosage | 2 - 50 g/100 L (depending on grape ripeness) |
| Application | The special granulation ensures it is easy to dissolve and use. Performs best when dissolved in hot water at 40 °C. Add this solution to the main tank and mix well. |

Storage

Tannivin® SR must be stored away from odours, moisture and light. Packs which have been opened should be immediately tightly sealed.
