The application recommendations given herein describe the intended use of the product as a processing aid or additive as part of a good manufacturing practice. Only this application can lead to a food safety of the final product. However, please note: Our technical product leaflets are based on our current knowledge and experience. They have to be seen as general information on our products only. Due to the imponderabilities of treating natural products and the potential prior treatment we cannot accept any liability. According to all national laws and regulations for use of our products has to be ensured by each user. All data is therefore provided without any warranty. All information is subject to change without prior notice. Our general terms of business apply, please refer to www.erbsloeh.com.

Product description

Tannin® Structure is produced from particularly pure quebracho tannin and is rich in proanthocyanidines (condensed tannins).

| Benefits | • Colour stabilisation in red wines during formation of tannin anthocyanin complexes  
• In must, Tannin® Structure limits oxidation of the free anthocyanins and promotes retention of grape tannins during fining.  
• Tannin® Finesse prevents the occurrence of a reductive flavour (maturation sur lies).  
• Optimises flocculation effect during fining. |

</thead>
</table>
| Application | The special granulation ensures it is easy to dissolve and use.  
Performs best when dissolved in hot water at 40 °C. Add this solution to the main tank and mix well. |

Storage

Tannin® Finesse must be stored away from odours, moisture and light. Packs which have been opened should be immediately tightly sealed.
